all kinds
of events.**

outdoor 
& indoor

Blizzard

Ideal for point of sale and event environments.

This is a popular tension graphic display capable of withstanding winds to a Beaufort scale 4 (13-18mph approx). The lightweight hollow base can be filled with sand or water for stability.

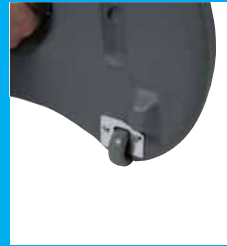

Storm Hydro 2 perfect for indoor and outdoor events.

This durable outdoor tension banner is perfect for both indoor and outdoor events and is capable of withstanding winds to a Beaufort scale 3 (10-12mph approx). Storm Hydro 2 can be used as a single or a double sided display for increased impact. The lightweight hollow base can be filled with sand or water for stability.

A Sign Board

for outdoor
and indoor use.

Suitable for A1 sized poster, the A Sign Board is a great addition to any event for sign-posting and promotion. Lightweight, steel backed and great value for money, the robust structure uses a spring loaded Trappa Frame mechanism which allows you to change your graphic message in an instant..

Whirlwind

ideal for pavement
advertising.

Suitable for more heavy duty use, the Whirlwind is perfect for A1 sized pavement advertising and retail promotion. The doublesided snap frame sign allows you to change your graphic very easily. The wheeled hollow base can be filled with sand or water for added stability. The spring pivot gives the display a swing motion and adds eye-catching movement to your message.

Horizon

for outdoor events,
advertisements
and exhibitions.

As the largest graphic display in the range, Horizon is the perfect solution for big scale promotions, each side has a graphic area up to 4.8cm². Single or double-sided, you can achieve maximum impact for your message, with individual units linking together to form a wall of display. Complete with water or sand weighted base, Horizon can withstand winds to Beaufort scale 3 (10-12mph approx).

Monsoon

ideal for use with
PVC eyelet banner.

As a large format landscape display, Monsoon is the ideal lightweight 'A' frame banner, available in 3 landscape formats. With push fit aluminium fixings and looped elastic graphic fitting, assembly is made quick and easy. Monsoon can withstand winds to Beaufort scale 5 (18-24mph approx).

Leader Cafe Barrier

ideal for defining areas
outside restaurants, bars
and shopping centres.

Leader is a portable modular cafe barrier system.
Heavy bases make it suitable for outdoor use enabling it
to withstand winds to Beaufort scale 4 (13-18mph approx).
The aluminium posts allow for adjustable graphic height
and multiple barrier configurations.

(Can not be left out in all weathers)

Products can be recycled

(does not include graphic application)

Rok

for more permanent indoor and outdoor, message displays.

Rok is designed to support rigid graphic panels such as PVC, Acrylic, Aluminium Composite, MDF (indoor only) and steel / aluminium sheet. Available with black base that can be water or sand filled for stability.

Tornado

for indoor or outdoor.

As a truly portable promotions counter, Tornado is a lightweight frame with tambour graphic wrap. Additional features such as support poles and header panel give a brilliant finish and high visibility. Fitted with a hollow base for water or sand the counter is stable and secure.

Post Flags

High visibility indoor or outdoor display banners.

With versatile fixings for both poles and wall the Mistral Flag range is ideal for both indoor and outdoor use. Fixing to lampposts and shopping mall displays are the most common application of this popular graphic carrier. All the products in the Mistral range have been tested to withstand winds to a Beaufort scale 7 (32-38mph approx) using a flag knit fabric.

Double-sided Mistral

Utilising both sides of your fixture, the Double Mistral has twin graphics and adjustable bracket heights for a range of graphic sizes..

Rotating Mistral

Using an adjustable height extended arm, the graphic is free to rotate in the wind.

Mistral Flag

Mistral can be attached using adjustable brackets to suit different graphic heights.

Zoom Range

great for long distance
visability either indoor
or outdoor.

Zoom flags are some of the most popular and versatile indoor or outdoor displays; available in a range of sizes from 1.8m to 5.8m high, they all feature lightweight glass fibre pole components to accommodate different flag shapes. Quill, Feather and Grande designs come complete with a choice of portable bases, making them suitable for many different applications.

Base Foot and Weighting Ring

Size guide

Zoom Grande

our largest zoom flag, Zoom Grande is available in a choice of heavy duty, weighted, weatherproof bases.

Cross Base.

Square base

Wind Dancer

for outdoor and indoor use.

Lightweight and easy to construct, this product offers complete stability with its water or sand filled base, enabling it to withstand winds up to Beaufort scale 4 (13-18mph approx). Unique design allows the flag to rotate and a telescopic pole allows the flag to be set at two fixed heights when the wind direction changes.

Available in a choice of 4m and 5m heights.
