Service Temperature

Urethane can be installed in a diversity of applications, with varying temperatures. The material's mechanical performance is known to remain stable in prolonged service in temperatures ranging from -20 to +60 °C.

Installation

Applications of Urethane must make adequate allowance for thermal movement. Adequate clearance must be allowed if holes are drilled for fixing and in rebates of support frames.

Fire Performance:

The fire performance of Urethane has been independently tested and the following classification obtained:

ISO 476: Part 7: CLASS 1Y
