Assembly Instructions

Kit includes: 1 x base, 1 x pole, 1 x top, 2 x screws and Allen key

Take the pole and slot onto the base, ensuring pole is leaning inwards and the hole is facing outwards.

Take one of the screws and thread through the pole and into the base. Tighten with the Allen key.

Slot the top onto the top of the pole, ensuring the hole in the top lines up with the hole on the pole.

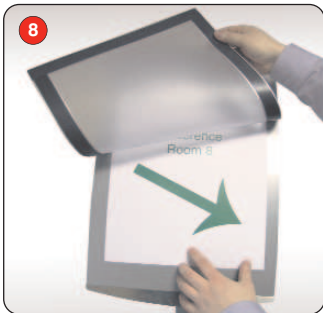

Thread other screw through the pole into the top. Tighten with the Allen key.

Now the unit is assembled, add the graphic. This process is the same for both sizes.

Lift up the front magnetic screen.

Position the graphic under the screen

Replace the screen, ensuring that the graphic is covered on all edges by the frame.
